

About Samsung Electronics Co., Ltd.

Samsung Electronics Co., Ltd. inspires the world and shapes the future with transformative ideas and technologies.

The company is redefining the worlds of TVs, smartphones, wearable devices, tablets, cameras, digital appliances, medical equipment, network systems, and semiconductor and LED solutions. For the latest news, please visit the Samsung Newsroom at news.samsung.com.

SimGrid™

DIAGNOSTIC CONFIDENCE

S-Vue™

S-Vue™ provides excellent, high resolution images for diagnostic accuracy and confidence. The S-Vue™ imaging engine's adaptive filtering and processing technologies offer outstanding sharpness and readability. Also, dose level can be reduced up to 45% dose reduction for pediatric abdomen, 15.5% for pediatric chest, and 27% for pediatric skull exams with the new S-Vue™ engine.

Case 1. Chest

Case 2. Abdomen

Case 3. Pelvis

Case 4. L - spine

Low Dose in New S-Vue™

S-Vue™ not only provides excellence in image quality, but also secures better patient safety in radiography examinations. This can help change the patient's perspectives for X-ray radiation and improve patient satisfaction.

Our Pledge for Low Dose

Samsung's Low Dose campaign is going to change your ordinary X-ray experience into our low dose imaging experience. Our commitment to lower dose will help you give more care to the ones you love. We will accompany with you as a lifetime partner in the right way.

Precise dose management features

Automatically optimized dose controls prevent excessive radiation exposure and provide precise dose control for patients.

- Pediatric Exposure Management
- Automatic filter with APR
- Individual blade control
- Dose Report
- AEC

*Note: The claim concerning Samsung DR is based on limited phantom and clinical study results. Only routine PA chest radiography and abdominal radiography for average adults and pediatric abdominal, chest, skull radiography were studied, excluding pediatric patients under 1 month old. (FDA cleared - K172229, K182183) In practice, the values of dose reduction may vary accordingly. These clinical images calculate the dose reduction rate from its own standard dose at the clinical site, unlike our FDA claim which compares dose between new IPE and old IPE. The clinical site is responsible for determining whether the particular radiographic imaging needs are not impacted by such x-ray dose reduction.

DIAGNOSTIC CONFIDENCE

New Detector

New Detector is the latest addition to Samsung's premium DR line-up improving on durability, environmental protection, and ergonomics to enrich the user experience.

Answer to Versatile Environment

Enhanced load allowance¹ along with dust and water resistance² allows the detector to be actively implemented in versatile environments. Its robust design will help reduce user concerns when applying the detector in complex situations such as ER and OR.

1) Allowed Point Load (4cm radius on the center) : 200 kg (441 lb), Surface Load : 400 kg (882 lb)

2) Dust & Water Resistance : IP54 (IEC 60529)

Enhance Your Daily Workflow

User-centric design of the detector to support patient positioning and alleviate daily burdens.

CENTER-ENGRAVING
to help position the patient

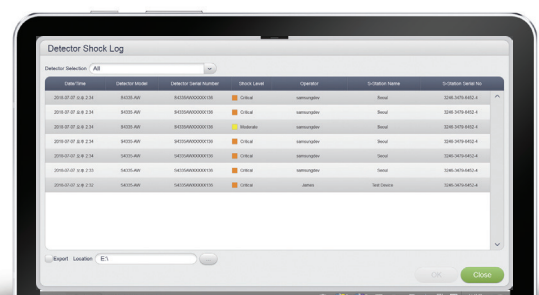

SIDE CHAMFER
to ease your lifting

REAR GRIP
to support transportation

Manage Your Detector Wisely

Continuous status tracking of the detector will upgrade user confidence and guarantee uptime. Features such as real-time shock sensing and detector auto correction will allow the detector to be in shape for use and help you respond quickly to critical detector shocks.

Real-time Shock Sensing

DIAGNOSTIC CONFIDENCE

SimGrid™*

With just a click, SimGrid™ allows you to provide better patient care with higher satisfaction and reduced retake rates without the use of a portable grid. It improves image contrast by reducing scatter radiation effects and creates better image quality.

Case. Chest AP

Images were taken with GM85

Without Grid

With SimGrid™

S-Enhance*

To support your diagnosis, S-Enhance improves the clarity of foreign bodies (e.g. tube, line and/or needle) in images of chest, abdomen, and L-spine. With a single on-screen click, the companion image is created without additional settings or x-ray exposure, streamlining the workflow.

Case. Chest AP

Images were taken with GM85

Without S-Enhance

With S-Enhance

* option

1) This feature does not have FDA clearance and is not for sale in the US.

Bone Suppression^{*}

Without additional setting or exposure, Bone Suppression Imaging improves the clarity of soft tissues by suppressing the appearance of bones in chest images, which improves your ability to detect nodules. You can easily create the companion image with just a click on the screen.

Case. Chest PA

Without Bone Suppression

With Bone Suppression

Auto Lung Nodule Detection^{*1}

Auto Lung Nodule Detection is a computer-aided detection software to identify and mark regions in relation to lung nodules. It is designed to aid the physician to review the frontal chest radiographs of adults.

Case. Chest PA

Without Auto Lung Nodule Detection

With Auto Lung Nodule Detection

STREAMLINE WITHOUT COMPROMISE

Fully automated system

GC85A enables fully automated operation along with the THU, motorized wall stand and patient table.

One-touch control

With one touch of the control panel's buttons, an operator can precisely position the entire system. The ability to easily reach the buttons enables the operator to focus on patient care.

GC85A Control Panel

1. Preset Button - P, T, S, H
2. Fast Up/Down Control
3. Auto Tilting Control
4. Slow Up/Down Control
5. Auto Sync Control
6. Auto Centering Control
7. All Lock
8. Tilting Angle Display

Motorized wall stand

Wireless system

Wireless system provides data transfer with an integrated wireless system that includes a wireless New Detector, remote control and wireless foot switch.

Auto-positioning

Auto-positioning makes it moves to more than 500 exam positions. The most frequently used position can be controlled with a handheld wireless remote control.

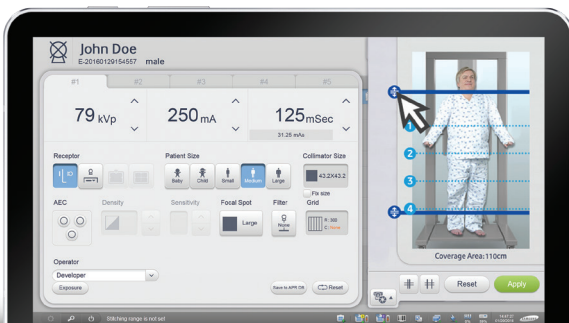

Auto-tracking

Auto-tracking synchronizes the movement of tube and detector automatically reduces repetitive workflows.

STREAMLINE WITHOUT COMPROMISE

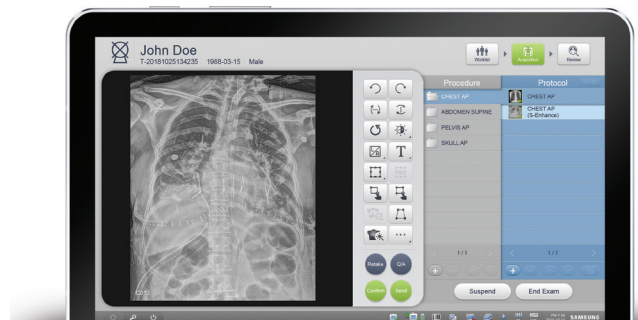

Smart Stitching with S-Guide^{*}

Smart Stitching can increase comfort for patients who find it difficult to stand for long periods of consecutive shootings. Viewing a stitched image of a whole spine or long bone is more convenient for making accurate diagnoses. With S-Guide, patients are displayed on screen via camera view in order to simplify the stitching settings, reducing the necessity of retakes.

SimGridTM^{*}

Software feature SimGridTM streamlines the workflow by guaranteeing image quality without the use of a conventional grid. This allows the omission of grid installation and removal step from the conventional workflow leading to 28% reduction in total exam time.

This image was taken with GM85

^{*} option

Soft Handling™

The Tube Head Unit (THU) can be moved into position gently with only a small amount of physical pressure from two fingers, so the operator avoids becoming fatigued from pulling the unit.

S-Align™

S-Align™ provides precise alignment for improved imaging and efficiency. When using detectors for free exams, S-Align™ displays the detector's angle to the THU for precise alignment and enhances the quality of imaging. Also, when the THU and detector are within a certain radius, the angle can be automatically aligned. This capability reduces repetitive exposure and saves time.

EXPAND PREMIUM EXPERIENCE

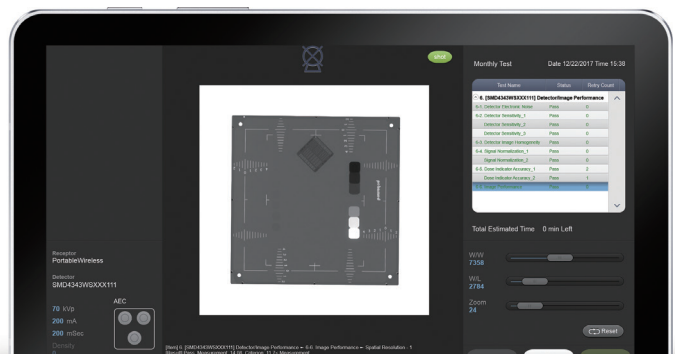

S-Share™

S-Share™ can dramatically increase efficiency through the use of New Detector with various existing compatible equipment. It enables accelerating connection for better synergy with premium digital radiography systems, GC85A & GM85.

QAP^{*} (Quality Assurance Program)

QAP assures improved imaging performance in a precise and cost-effective way. It enables comprehensive system management by automatic periodic test measuring multiple parameters such as source performance, AEC accuracy, geometry accuracy, and detector performance with image quality.

* option

Samsung Healthcare Cybersecurity

Bring peace of mind to your hospital and patients

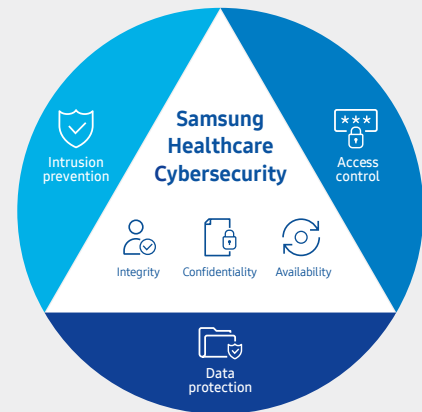

Tools for protecting against cyber threats from external attacks

Encryption functions for safeguarding data whether at-rest or in-transit

Strengthened surveillance for tracking of patient information

Shared Bucky™

Shared Bucky™ is designed for sharing multiple detector devices on one place and can be used on a table with S4335-AW and S4343-AW. Shared Bucky™ with S4335-AW can be placed in landscape and vertical directions to capture images such as tall patients' spines.

Value care service

Remote Maintenance System

This RMS continuously monitors any system errors and automatically identifies the system and software version.

24/7 call center

Our customer support center operates 24 hours per day, 365 days a year to quickly respond to any questions or problems you may have.

Upgrade service

Staying up to date is quick and easy. Samsung offers you the latest products through optional detector upgrades, as well as hardware and software upgrades.

Service offering

You have the flexibility to choose from our wide range of service and support programs to create a tailored program that best meets your unique requirements.

Maintenance service availability may vary by country.

Service countries are Germany, France, Italy, China, India, USA, Brazil, etc.
